What's driving your energy price		Did you know?	06.05.2025 Issue 2
Bullish Factors	Bearish Factors	US Oil Rig Count Declines Baker Hughes reported a drop in US oil rig counts for a fifth consecut week on May 30, with rigs falling to 461 – its lowest level since la 2021. This is 6.3% or 31 rigs lower than the same time last year. T reduction in drilling activity could tighten future supply, particularly global oil demand increases and geopolitical tensions escalate. Ongo economic uncertainty, rising operational costs, and volatile prices ha made new projects more expensive and less appealing. While lower counts do not immediately lead to reduced output, sustained declir over time may contribute to upward pressure on prices in the com months.	
 The Russia-Ukraine war continues to escalate, with Ukraine staging a series of strikes across Russia and Russia launching one of its longest drone and missile attacks against Kyiv over the weekend Wildfires in Alberta have shut down about 7% of the country's oil production 	 OPEC+ agreed to increase July oil output by 411kb/d Kazakhstan has stated that it plans to increase oil production by the end of the year instead of cutting it
